16.05.2013

The Novosibirsk State Medical University and Technische Universität Dresden have the Agreement on Academic Exchange dated 02.04.2012г.

- Promotion of joint research and educational activities;
- Invitation to short-term visits of faculty members and researchers for lectures, conferences, colloquia, and symposia;
- Exchange of information and pertinent publication in fields of interest to both universities;
- Exchange of faculty members, researchers and students for study and research.

Erasmus Mundus

Novosibirsk State Medical University actively participates in the Erasmus Mundus programs.

- In 2012 we became an Associate Partner of the Consortium of **Erasmus Mundus Action 2 Consortium**.
- In 2013 the TU Dresden would like to keep our University as an Associate Partner in the **Erasmus Mundus Action 2 Consortium**.

The Main Activities of this Consortium are:

Broad-based exchange of EU and RF undergraduate, graduate and doctoral students, postdoctorate researchers and teaching staff.

Providing opportunities to RF nationals working in public administration, public and private enterprises with study, training or research opportunities in the EU.

Erasmus Mundus

Due to this cooperation a PhD student from the Novosibirsk State Medical University got financing for the implementation and carrying out of research work. The host university was the Medical Faculty Carl Gustav Carus (TU Dresden).

In 2012 a student carried out research work under the supervision of Head of the Department of Prevention and Care of Diabetes of the Uniklinikum, Technical University of Dresden Prof. Peter Schwarz.

The main areas of research were the manifestations of diabetic nephropathy in patients with diabetes of the 2d type; relation between the insulin resistance and kidney functions as well as the use of new instruments for the diagnosis of the risk of diabetes of the 2d type.

Scientific Cooperation

Part of the project of the Department of Public Health of the Novosibirsk Mayor's Office in the prevention of 2-type diabetes is implemented on the bases of the Novosibirsk State Medical University and the Uniklinikum of the Technical University of Dresden.

“Implementation of Research Project for Diabetes-Type-2-Prevention in the Novosibirsk Region”

Novosibirsk State Medical University participated in the program financed by the German Academic Exchange Service (DAAD).

A group of 10 students of the Medical Faculty of the Novosibirsk State Medical University visited:

The Charité – Universitätsmedizin Berlin
of the Humboldt University of Berlin

Faculty of Medicine of
Universität Leipzig

but the main host university was the Faculty of Medicine Carl Gustav Carus of TU Dresden.

The students got acquainted with the structure of the University and Medical Faculty, organization of the academic process and peculiarities of training a medical specialists, visited lectures and practical classes.

Initial Visits

In order to train highly qualified specialists in the field of medicine our universities arranges initials visits during which the leaders of the university meet with the specialists of TU Dresden, visit lectures, practical classes.

Initial Visits

These visits are aimed to exchange experiences for the training of a competitive specialists answering international standards and requirements; study and analyses the experience of training medical specialists overseas.
