

The Essence of Elegance

If the clothes make the man, then pick yours out at Canali. **Tiffany Parks** takes a peek.

What makes a man sophisticated and elegant? Beyond his immanent traits and personal style, a well-cut suit is the first key ingredient. Add to that a pair of impeccable leather shoes, a simple belt, a tasteful silk tie, perhaps even a jaunty pocket square if he's particularly refined. Top it all off with a pair of understated cufflinks, and the perfect man—at least from an aesthetic point of view—is complete.

But where to find these elusive ingredients? If you won't settle for anything less than the very best Italy has to offer, you'll find what you need at **Canali**. This luxury menswear fashion house has been in family hands for three generations, since its inception more than 80 years ago. From ceremonial attire such as suit jackets and tuxedos to their wide sportswear line, from a wealth of accessories including belts, wallets, luggage, gloves, ties, scarves, pocket

squares, and cufflinks, to shoes that range from classy Oxfords or Derbys, to the more casual Loafer, they feature everything a dapper gentleman could possibly require to look his best.

Canali prides itself on its rigorous attention to the quality of fabrics—whether intended for formal or casual garments—its passion for details that most people overlook, and its sharp eye on contemporary trends. And unlike many of the other big names in elite Italian fashion, Canali still manufactures every single piece of their inventory in Italy, in seven factories across the country. In addition, their tailoring services allow customers to create an exquisitely personal style through the creation of

bespoke suits. They believe that the hallmark "Made in Italy" tag is more than just a label, but rather the result of a long journey in which culture, history, style, and taste intertwine, resulting in products that embody excellence, professionalism, quality, and reliability.
